Advanced

## Objectives

You must follow the same principles as the first subject.

Ascii-art-stylize consists on making your site :

- more appealing, interactive and intuitive.
- more user friendly.
- give more feedback to the user.

## Instructions

- Your project must contain **CSS**.
- The code must respect the **good practices**.
- We suggest that you search for the principles of a good website design.
- It must be possible to see the text properly regardless of the colors used.
- The website must be consistent, responsive and interactive.

## Allowed packages

- Only the standard go packages are allowed

This project will help you learn about:

- The basics of human-computer interface.
- The basics of CSS.
- Linking CSS and HTML.

Something is wrong ? Submit an issue or even better propose a change !
